National Pension System (NPS)

NPS, regulated by PFRDA, is an important milestone in the development of a sustainable and efficient voluntary defined contribution pension system in India. It has the following broad objectives:

- To provide old age income
- Reasonable market based returns over the long term
- Extending old age security coverage to all citizens

Welcome to the National Pension System

NPS offers following important features to help you save for retirement:

- You will be allotted a unique Permanent Retirement Account Number (PRAN). This unique account number will remain the same for the rest of your life. You will be able to use this account and this unique PRAN from any location in India.
- PRAN will provide access to two personal accounts:
 - **Tier-I pension account:** You will contribute your savings for retirement into this non-withdrawable account.
 - **Tier-II savings account:** This is simply a voluntary savings facility. You will be free to withdraw your savings from this account whenever you wish.

Tier-I account is available from 1st May 2009, while Tier II account has been made available from 1st December, 2009.

Under NPS, how your money is invested will depend upon your own choice. NPS offers you a number of fund managers (six) and multiple investment options (three) to choose from. In case you do not want to exercise a choice as regards asset allocation, your money will be invested as per the "Auto Choice" option.

You can open an NPS account with authorized branches of service providers called 'Points of Presence' (POPs). You have the option to shift from one branch to another branch of a POP at your convenience.

The tax benefits under NPS will be as per the provisions of the Income Tax Act, 1961 as amended from time to time.

Swavalamban Scheme

Under the scheme, Government will contribute Rs. 1000 per year to each eligible NPS account opened in the year 2010-11 and for the next three years, that is, 2011-12, 2012-13 and 2013-14. The benefit will be available only to persons who join the NPS with a minimum contribution of Rs. 1,000 and maximum contribution of Rs. 12,000 per annum. Conditions apply

To get the most out of the NPS, you need to make several important decisions about your account. This booklet will help you get started. **To learn more about the NPS, please ask your nearest POP-SP for a copy of the offer document containing the detailed features of the NPS, or download one from the PFRDA web site (www.pfrda.org.in).** The forms and publications referred to in this booklet can be obtained from the web site or your nearest POP-SP.

Getting Started

You can enroll in the NPS at any time if you are a citizen of India and at least 18 years of age; no entry is, however, allowed after 60 years of age. To enroll in the NPS, submit the Registration Form (UOS-S1) to the POP-SP of your choice. The form is available from POP-SPs and the PFRDA web site (www.pfrda.org.in).

Investing in the NPS

The NPS offers you two approaches to invest in your account:

- Active choice - Individual Funds (E, C and G Asset classes)
- Auto choice - Lifecycle Fund

Active choice - Individual Funds

You will have the option to actively decide as to how your NPS pension wealth is to be invested in the following three options:

E - **"High return, High risk"** – investments in predominantly equity market instruments

C - **"Medium return, Medium risk"** – investments in predominantly fixed income bearing instruments

G - **"Low return, Low risk"** – investments in purely fixed income instruments.

You can choose to invest your entire pension wealth in C or G asset classes and upto a maximum of 50% in equity (Asset class E). You can also distribute your pension wealth across E, C and G asset classes, subject to such conditions as may be prescribed by PFRDA. **In case you decide to actively exercise your choice about investment options, you shall be required to mandatorily indicate your choice of Pension Fund from among the six Pension Funds appointed by PFRDA.**

Auto choice - Lifecycle Fund

NPS offers an easy option for those participants who do not have the required knowledge to manage their NPS investments. In case you are unable/unwilling to exercise any choice, your funds will be invested in accordance with the Auto Choice option.

In this option, the investments will be made in a life-cycle fund. Here, the fraction of funds invested across three asset classes will be determined by a pre-defined portfolio. At the lowest age of entry (18 years), the auto choice will entail investment of 50% of pension wealth in "E" Class, 30% in "C" Class and 20% in "G" Class. These ratios of investment will remain fixed for all contributions until the participant reaches the age of 36. From age 36 onwards, the weight in "E" and "C" asset class will decrease annually and the weight in "G" class will increase annually till it reaches 10% in "E", 10% in "C" and 80% in "G" class at age 55.

Like the active choice subscriber must choose one PFM under auto choice.

(Detailed information about Auto choice is available on the PFRDA Web site: www.pfrda.org.in)

Visit the PFRDA Web site (www.pfrda.org.in) for detailed fund descriptions and information on fund performance.

Active choice

While exercising an Active Choice, remember that your investment allocation is one of the most important factors affecting the growth of your pension wealth. If you prefer this “hands-on” approach, keep the following points in mind:

- Consider both risk and return. The E Asset class has higher potential returns than the G asset class, but it also carries the risk of investment losses. Investing entirely in the G asset class may not give you high returns but is a safer option.
- You can reduce your overall risk by diversifying your account. The three individual asset classes offer a broad range of investment options, its good not to put “all your eggs in one basket.”
- The amount of risk you can sustain depends upon your investment time horizon. The more time you have before you need to withdraw from your account, the more is the risk you can take. (This is because early losses can be offset by later gains.)
- Periodically review your investment choices. Check the distribution of your account balance among the funds to make sure that the mix you chose is still appropriate for your situation. If not, rebalance your account to get the allocation you want.

Net Asset Value (NAV) will be released on a regular basis so that investors may be able to take informed decisions.

The system for scheme preference change has been made available with effect from 1st June, 2010. The window for scheme change preference shall remain open throughout the year. The subscriber shall be allowed to exercise the choice only once, at any time during the financial year.

Neither the Active Choice nor the Auto Choice provide assured returns.
